Gender:	Female	Date of Admission:	12-01-2026

Clinical Information

Proposed Procedure:	Cosmetic Abdominal Liposuction
CPT Code:	15877
Diagnosis:	Localized Adiposity
ICD-10 Code:	E65
Vital Signs:	BMI: 27.4 kg/m ²

Estimated Billing Details

Description	Amount (INR)
Cosmetic Surgeon Fees	■ 150,000.00
Anesthesia (Sedation)	■ 35,000.00
Facility Fees (Daycare)	■ 50,000.00
Compression Garments	■ 15,000.00
Follow-up Consultations	■ 10,000.00
TOTAL ESTIMATED COST	■ 260,000.00

Clinical Justification

The patient requested surgical intervention for abdominal body contouring. The procedure is intended for the removal of localized fat deposits that have not responded to diet. The patient's BMI is 27.4 (Overweight), and there are no associated medical comorbidities that would necessitate this procedure for health reasons. This intervention is classified as an elective cosmetic procedure for aesthetic improvement of body shape.

Detailed Treatment Planning

- Pre-surgical marking of treatment areas.
- Suction-assisted lipectomy (Liposuction) under intravenous sedation.
- Application of compression garments immediately post-procedure.
- Post-operative monitoring in the recovery suite for 4 hours.
- Discharge with instructions for wound care and activity restrictions.
