Surgeon Fees	1,80,000.00
Anesthesia	45,000.00
Hospital Stay (4 days)	80,000.00
OT Charges & Consumables	60,000.00
Post-Op Medications	15,000.00
TOTAL ESTIMATED COST	INR 3,80,000.00

CLINICAL JUSTIFICATION

Patient presents with a BMI of 43.5 kg/m², classified as Morbid Obesity. Concurrent medical conditions include Type 2 Diabetes Mellitus and Grade II Hypertension. The patient has attempted supervised weight loss programs for over 12 months without significant sustained results. Bariatric surgery is medically necessary to mitigate life-threatening risks associated with obesity and to improve glycemic control.

DETAILED TREATMENT PLANNING

Pre-operative: Cardiac and Pulmonary clearance, nutritional counseling. Surgical: Laparoscopic Sleeve Gastrectomy under general anesthesia. Post-operative: 48-hour monitoring in ICU/Step-down, liquid diet progression, and long-term metabolic follow-up.
