Medicines & Consumables	25,000.00
Lab Tests & Diagnostics	11,000.00
Total Estimated Cost	2,66,000.00

CLINICAL JUSTIFICATION

The patient, Priya Das, presents with a BMI of 42.5, which classifies as Class III Morbid Obesity. The patient has documented failures in multiple medically supervised weight loss programs over the past 24 months. Co-morbidities include hypertension and sleep apnea. Surgical intervention via Laparoscopic Sleeve Gastrectomy is medically necessary to prevent further metabolic decline and cardiovascular

complications.

DETAILED TREATMENT PLAN

1. Pre-operative: Cardiac and pulmonary clearance, nutritional counseling, and 2-week liquid diet.
2. Surgical: Laparoscopic Sleeve Gastrectomy under general anesthesia.
3. Post-operative: 48-72 hour hospital monitoring, gradual transition from clear liquids to soft foods over 4 weeks.
4. Follow-up: Scheduled visits at 1 week, 1 month, 3 months, and 6 months post-surgery.
